

Kwiz

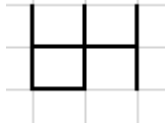

The last quarter's quiz:

Complete following series:

The correct answer: 64.

These are actually digital display numbers. 25, 36, 49,...; The numbers are increasing by 11, 13 and so the next number in the series is 15 greater than 49 or 64.

The following gave the right answers:

Praveen Kamath, Centreville, VA

Govind Kamath, Austin, TX

Sunil G. Shenoy, Spring, TX

Continuing with the Konkani tradition of quizzing, here's the brainteaser for this quarter. If you can solve this correctly, send it to Khabbar address to have your name published in the next issue if your subscription is current.

Ram and Sham travel a distance, from point A to point B, of 50 miles leaving at the same time. While going from point A to point B both of them drive at a speed of 55 miles per hour but Ram stops for 15 minutes. On their return journey from point B to A, both of them drive at 65 miles per hour but Sham stops also for 15 minutes. Assuming they are driving at a constant speed and there are no other stops, who reaches point A first?
